The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 8-12 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Zaharia et al. (U.S. Patent 5,708,416).

Zaharia et al. show a passenger conveyor system 10 having a plurality of steps arranged in a loop, a not shown drive machine, a controller 40 and a receiver 50 that receives a wireless signal indicating a need to reduce a speed of movement of the steps. See column 4, lines 26-48 for a description of the use of wireless technology. Note also the stopping of the escalator is a reduction of speed.

Re claim 2, see column 5, lines 33-39 for a description of a gradual reduction in speed.

Re claim 8, shown are landings at opposite ends of the loop and at least one receiver.

Re claim 9, Figure 4 shows a portable signaling device 70.

Re claim 10, the portable signaling device 70 includes at least one switch that is selectively activated by a user to transmit a signal.

Re claim 11, speed is reduced in response to a generated signal.

Re claim 12, the speed of the steps is gradually reduced.

Re claim 17, the receiver 50 is in communication with the controller 40.

Re claim 18, see Figure 4.

Re claim 19, there is at least one receiver near the landings.

Claims 3-7, 13-16, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
